SUMMARY

Software Engineer experienced in full-stack application development, backend APIs, workflow support, debugging, testing, authentication, and database development. Builds production-oriented software solutions and user-facing portals with a focus on reliability, security, and maintainability.

WORK EXPERIENCE

Patika Technology Limited (Sanifu AI)

Nairobi, Kenya

Workflow Support Engineer

March 2026 - Present

- Diagnosed and resolved workflow failures or inaccuracies across multiple workspaces and apply fixes such as logic updated and data corrections to improve workflow reliability.
- Monitored and debugged workflow behavior across 2 environments, staging and production, using support requests, logs, and platform debugging tools to identify root causes and resolve customer-impacting issues.
- Performed regression testing after workflow fixes and validated 100% of applied changes across staging and production, ensuring fixes resolved for reported issues.

Tianlong Industries Limited

Tatu City, Kiambu, Kenya

Software Engineer

May 2024 - August 2024

- Developed and deployed a full-stack Safety Management System using Next.js, Node.js, Express, and MongoDB, enabling 100% digital recording of near-miss incidents and improving workplace safety tracking efficiency.
- Implemented JWT-based authentication and role-based access control, securing sensitive safety records and ensuring that only authorized admins could perform operations, reducing unauthorized access risks by over 90%.
- Built a modern, responsive landing page to showcase the company's product catalogue, improving brand visibility and increasing customer engagement by 35% through an optimized UI/UX.

Aeres Technologies Limited

Ruiru, Kiambu, Kenya

Software Engineer

June 2025 - August 2025

- Designed and developed a Customer Portal that allowed users to securely view loan status, payment plans, and device details, improving customer self-service and reducing support queries by 25%.
- Built a Finance Portal for internal teams to manage payments, loan tracking, and transaction monitoring, streamlining financial operations and enhancing reporting accuracy by 30%.
- Implemented robust authentication and security features, including OTP verification and PIN recovery, strengthening data security and reducing account recovery requests by 40%.

EDUCATION

Machakos University

Machakos, Kenya

Bachelor of Science in Information Technology

September 2021 - April 2025

SKILLS & COMPETENCIES

Frontend: HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS
Backend: JavaScript, Node.js, Express.js, Nest.js, Python, Django, FastAPI, PHP, Laravel
Databases: MongoDB, PostgreSQL, MySQL
Tools & DevOps: Git, GitHub, Postman, VS Code
Practices: Agile Development, Responsive Design, Performance Optimization, SEO

PROJECTS

Student Skill Match System

React.js, Next.js, TypeScript, Tailwind CSS, ShadCN, Node.js, Express.js, MongoDB

<https://student-skill-match.vercel.app/>

Students struggled to find compatible teammates for academic projects and hackathons. The platform matches users by skills, interests, and roles, supporting team formation, communication, and collaboration while improving teammate discovery and reducing time spent finding suitable project partners.
